

The new **BHT** boring system is characterized by the new **HT** coupling suitable for medium-heavy machining, characterized by strong torsional components with maximum concentricity.

BHT bars cover a working range from \varnothing 250 to \varnothing 750 mm, both in roughing and finishing.

The wide range of accessories includes adjustable ISO-CA roughing cartridges and a standard TRM 63 finishing micrometric head, suitable for boring, chamfering and back-facing operations.

The system in FINISHING configuration can be balanced by using counterweights.

12. BACKWARD

For **ROUGHING** operations
use TS 63/63+SSQC 63 see page 26

For **FINISHING** operations
use TRM 63+PS..+SFQC 50 see page 26
